
'SPEAK UP' POLICY

Fostering and promoting a 'speaking up' culture.

Ionic Technologies highly values and promotes a speaking up culture, where all Disclosing Persons feel comfortable to raise matters that are of legitimate concern to them, relating to a potential breach of any legal or regulatory requirement.

Our Whislpi App is available to anyone who wishes to report inappropriate behaviour or concern in confidence when our values and standards are not being followed. Click the QR code to download the App.

From this website, you can choose to submit your concern regarding an activity that you feel is contrary to our Business Code of Conduct anonymously, or not. Regardless of your choice, a case manager will be assigned to investigate your concern.
